## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of species (i)(a), (ii)(b) and (iii)(a) in the reply filed on March 26, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 3, 9, 15, and 17 are withdrawn herein.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 4-8, 10-14, 16, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1154500. The reference teaches an electrochemical cell having an anode comprising an alkali metal and a cathode comprising an intercalation material (see [0014]). The cell further comprises a casing having a curved wall (see Fig. 8). The anode and cathode are

Art Unit: 1745

unitary members having face portions connected by connecting portions (see Fig. 2). The electrode assembly is wound such that the size of the face portions decreases in an outward direction (see [0046]). The cell can be case-positive or case-negative and may, for example, contain six anode face plates and five cathode face plates (see [0030], [0045], [0046]).

Thus, the instant claims are anticipated.

4. Claims 1, 2, 4-8, 10-14, 16, and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Spillman et al (U.S. Patent 6,635,381). The Spillman '381 patent corresponds to the EP '500 publication and is applied for the reasons stated above.

#### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

Art Unit: 1745

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1, 2, 4-8, 10-14, 16, and 18 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-32 of U.S. Patent No. 6,635,381. Although the conflicting claims are not identical, they are not patentably distinct from each other because the '381 patent claims anticipate at least the independent claims of the instant application and render the remaining claims obvious.
